

Practical Solutions to Everyday Challenges 2017

TIPS AND STRATEGIES FOR SUCCESSFUL MEDICAL CARE FOR INDIVIDUALS WITH AUTISM AND OTHER DISABILITIES

Join us to review the current state of health care for patients with autism and other developmental disabilities in pediatric and adult care settings, including barriers to high quality care and how to overcome them. Discuss strategies for patients, families, caregivers and health care professionals to make clinic and hospital visits more effective, learn about patient and family centered care and how to use Ohio's Guiding People Through Systems, an online care notebook to help families, caregivers and adults with disabilities organize, store and access important medical, school and care records. Participants will receive a binder of resource materials full of great forms, practical suggestions, and tangible, concrete aids to building better health care.

Presenters: Dr. Christopher Hanks of The Ohio State University Center for Autism Services and Transition (by videotape), Dr. Karen Ratliff-Schaub, developmental pediatrician at Nationwide Children's Hospital (by videotape), and parent advocates, Marie Crawford and Kathi Machle.

Wednesday, May 10, 2017
6:30 to 8 p.m.
Beacon School
801 West Union St., Athens, Ohio

This workshop is FREE. However, please RSVP to 614-284-6323 or autismcentralohio@gmail.com so that we have enough handouts available for all attendees. Childcare available upon request.
